

## CMS Website Design (Content Management System)

**So what exactly is a CMS web site?**

CMS or a 'Content Management System' quite literally allows you to control and manage the content within your web site - without technical training. Using this uncomplicated system you can very easily add, delete images and edit text in your web site on the fly. You can also have an unlimited number of pages and a full site-search engine. What's more... with 'Navega Bem - Web Design' you can have a highly professional CMS web site at a very reasonable price indeed!

If you are already familiar with 'Content Management Systems' then click here to see the advantages of our [Joomla! CMS](#) solution.

**Great for users with no programming or HTML experience?**

Simply put, if you have just a little experience with Microsoft Word then you will be able to manage the content of your own web site very easily indeed. You need have no programming or HTML experience. Editing can be done with any normal web browser from anywhere in the world - or with your iPhone :)

**See our 1 minute CMS Demo movie**

Most people new to the world of CMS websites cannot imagine how they could ever manage their site themselves. So, see our [Joomla demo movie](#) which shows how you can update your website and publish it - all in just 1 minute!

**Why is it time for you to opt for CMS?**

Many companies find it difficult to keep their web site content as up to date as they would like. Often there are delays getting new content online, the site stagnates and your clients get to see outdated information. That's why so many companies are turning to CMS. [Meet Vanessa and Bertha for an enlightening example.](#)

A CMS web presence allows you to manage your web site even if you have no technical knowledge, experience with HTML or web site design. It also reduces the calls to your web design agency or IT department for changes to the web site. CMS reduces the time required to publish, allowing you to get your content on-line faster. This is a very important issue for any professional web site.

**Why use 'Navega Bem' to develop your CMS website?**

You have read some really amazing things about CMS on this page. Having a web site that you can manage yourself is the perfect solution for most companies.

However, you need a professional company to design and develop your site. Navega Bem are professional Joomla developers. Our sites are featured in many online design portfolios. Our sites don't only look good - we market them so that they perform well and bring you traffic and business.

It's no coincidence that we are chosen to develop websites by companies from Dubai to New York to California to Hong Kong to London to Lisbon to Naples to Hamburg to... need we say more?

In the field of web design you really do get what you pay for. Let's face it - it doesn't matter how little you paid for your website or how attractive it is. If it can't rapidly be found in the search engines then it is losing money for you every single day. Now that is a very expensive website!

Once 'Navega Bem - Web Design' has developed your CMS site, it belongs to you. There are no monthly fees - no license fees - no maintenance fees - you are not tied to us in any way. You login to your own website to control your own content. You have complete independence and total control! If you should require any support, then of course we are there for you.

Simply [contact us for a hands-on demonstration](#) and see how CMS can help you to become highly competitive on the world wide web. [Follow this link to learn more about our Joomla! Content Management System solution.](#)
